Summary

Motivated junior web developer with experience in JavaScript, web application development, and version control systems. Passionate about software architecture, modern web technologies, and continuous learning. Experienced in both frontend and backend development through freelance and personal projects. Currently expanding my knowledge of C++ while developing personal applications and maintaining an active GitHub portfolio. Looking for a remote opportunity where I can grow professionally and contribute to real-world projects.

Skills

Languages & Tools

- JavaScript, Python, C++
- HTML5 / CSS3
- Node.js
- Git / GitHub
- Linux / Windows / MacOS
- VS Code
- Web / Full-Stack Development

Education

2024 - 2025

College of Cybernetics and Information Technologies

Cybernetics Professional College,
Robert Elworthy Economic and
Technological Institute (ETI)

Completed first year of studies with a focus on JavaScript front-end and back-end development, web development fundamentals, and basic web design. Studies were interrupted due to relocation to Poland.

2025 - 2027

Technical School (IT Profile)

ZDZ K.K. Baczyńskiego, Biała Podlaska

Completed first year of studies. Covered basics of databases and operating systems. The majority of additional skills were developed independently through self-study, with a focus on programming and continuous learning of new technologies.

Work experience

2023 - Present

Freelance & Personal Projects

- Participated in the development of e-commerce websites as part of a small development team.
- Worked on both frontend and backend tasks, including interface implementation and application logic.
- Created landing pages for personal learning and small client projects.
- Developed browser-based games using JavaScript for educational and portfolio purposes.
- Maintain personal projects on GitHub using Git version control.
- Currently developing a personal portfolio website featuring projects, photography, and technical experience.
- Regularly work with Windows, Linux, and macOS environments.
